Before you can start any demolition project you must meet the requirements of the Puget Sound Clean Air Agency (PSCAA). This may include conducting an asbestos survey and may mean filing a demolition notification with PSCAA. For more information, contact the Agency through their website at: <http://www.pscleanair.org/asbestos>, or by calling 206-343-8800.

The purpose of this acknowledgement and agreement is to inform the owner / representative of the Air Pollution Control Agency's mandates under RCW 49.26, and to ensure that the property owner, applicant, and/or representative is aware of and acknowledges compliance with all applicable regulations governing asbestos. The City of Port Orchard will hereby issue demolition and remodeling permits to applicants who agree to handle, remove, and dispose of asbestos by taking the maximum precautions as specified by all applicable federal and state requirements.

RCW Title 49 Chapter 49.26 Health and Safety - Asbestos provides guidelines for asbestos handling. Specifically, RCW 49.26.013 states, "an inspection under this section is not required if the owner or owner's agent is reasonably certain that asbestos will not be disturbed or assumes that asbestos will be disturbed by a project which involves construction, renovation, remodeling, maintenance, repair or demolition and takes the maximum precautions as specified by all applicable federal and state requirements." (A copy of 49.26.013 is attached.)

This agreement neither waives nor supersedes any permits which may be required from the Puget Sound Clean Air Agency.

I, the owner or authorized applicant/agent have read this agreement and the attached RCW 49.26.013 and agree to remove, handle, and dispose of all asbestos material by observing the maximum precautions detailed in all applicable codes and regulations. I acknowledge that I know of and am complying with the Puget Sound Clean Air Agency's requirements regarding asbestos abatement and demolition notification.

The information on this form and associated documents are considered public records and subject to public disclosure laws in Chapter 42.56 RCW

Inspection of construction projects required.

(1) Any owner or owner's agent who allows or authorizes any construction, renovation, remodeling, maintenance, repair, or demolition project which has a reasonable possibility, as defined by the department, of disturbing or releasing asbestos into the air, shall perform or cause to be performed, using practices approved by the department, a good faith inspection to determine whether the proposed project will disturb or release any material containing asbestos into the air.

Such inspections shall be conducted by persons meeting the accreditation requirements of the federal toxics substances control act, section 206(a) (1) and (3) (15 U.S.C. 2646(a) (1) and (3)).

An inspection under this section is not required if the owner or owner's agent is reasonably certain that asbestos will not be disturbed or assumes that asbestos will be disturbed by a project which involves construction, renovation, remodeling, maintenance, repair, or demolition and takes the maximum precautions as specified by all applicable federal and state requirements.

(2) Except as provided in RCW 49.26.125, the owner or owner's agent shall prepare and maintain a written report describing each inspection, or a statement of assumption of the presence or reasonable certainty of the absence of asbestos, and shall provide a copy of the written report or statement to all contractors before they apply or bid on work. In addition, upon written or oral request, the owner or owner's agent shall make a copy of the written report available to: (1) The department of labor and industries; (2) contractors; and (3) the collective bargaining representatives or employee representatives, if any, of employees who may be exposed to any asbestos or material containing asbestos. A copy shall be posted as prescribed by the department in a place that is easily accessible to such employees.
