The State of Georgia has adopted the 2024 International Swimming Pool and Spa Code as a mandatory code to follow when installing a pool or spa. This code and the State of Georgia amendments must be used to determine installation requirements.

The issuance of a permit shall be considered permission to proceed with the work required and shall not be misconstrued as authority to violate, alter, or set aside any of the provisions of the applicable code, nor shall such issuance of a permit deter the Building Official from thereafter acquiring a correction of errors in plans, in construction, or in violations of this Code.

In addition, it shall be the duty of the person permitting the installation to notify the administrative authority that said work is ready for inspection during the installation process, including Section (305) barrier requirements.

I understand it is my responsibility to call for all inspections, including a final, after all work is complete. Such final inspection shall include fencing around pool.
