

Shoreline Conditional Use Permit

**Development and
Permitting Services**
333 S. Meridian
Puyallup, WA 98371
253-864-4165
www.cityofpuyallup.org

Application Fees

Small: **\$880**

≤10,000 SF of new structure or
≤20,000 SF of affected site area

Medium: **\$1440**

10,001-19,999 SF of new structure or
20,000 - 39,999 SF of affected site area

Large: **\$2080**

20,000+ SF of new structure or
40,000+ SF of affected site area

Additional review fees, if applicable:

- Variance: \$770 (to be halved)
- SEPA review: \$250
- Critical area review: \$160

A shoreline conditional use permit requires a case-by-case review of certain uses which may have a greater potential for impacts if permitted without project-specific conditions. In authorizing a shoreline conditional use permit, special conditions may be attached to the permit by the Hearing Examiner or Ecology. Shorelines of significance in the city of Puyallup include the Puyallup River and Clarks Creek downstream of Mapelwood Springs. Shorelines and their associated uplands extend 200-feet in all directions from the ordinary high water mark.

To help you understand City standards and the Shoreline Substantial Development process, a pre-application meeting is strongly encouraged.

Submittal Instructions

- 1 Create an account on <https://permits.puyallupwa.gov/Portal>
- 2 Select "Apply for Planning Permit"
- 3 Select "Shoreline Conditional Use Permit" from drop down list. Fill out all sections of the online form and upload all required documents. Note: Failure to upload all the required documents will delay the processing of your application.

Property Address(es): _____

Parcel Number(s): _____

Nature of Request (be specific):

Landscaping

Most projects will be required to meet the landscaping standards of **PMC 20.58 Landscaping Requirements** and the **Vegetation Management Standards (VMS)** Manual as well as other landscaping requirements based on the use and development pattern of the proposal. The VMS can be found at www.cityofpuyallup.org/DocumentCenter/View/1133/Vegetation-Management-Standards and its appendix can be found at www.cityofpuyallup.org/DocumentCenter/View/6054/VMS-Appendices-Complete-Document .

Existing vegetation on the site which is larger than 15" in Diameter at Breast Height (DBH) is considered to be a 'significant tree' and must be retained where possible. If your site includes any significant trees, then you must include a tree risk assessment completed by a certified arborist with this application.

Critical Area Identification

The purpose of this section is to determine if a critical area report is required due to the development site being on or near any critical areas. All critical areas identified and their associated buffers, must be shown on the title and map. You can look up critical areas and buffers on the City's interactive GIS portal at <https://gis-portal-puyallup.opendata.arcgis.com/> then scroll to the "Applications" section of the page and select "City of Puyallup Critical Areas App" to view. If there are critical areas on or adjacent to the subject parcel, you may be required to provide a critical area report(s). Please see PMC 21.06.530 for general critical area report requirements. Please contact the planning division for critical area questions.

Based on the applicant's knowledge and research of the project site, please select any of the critical areas listed below that are located on or within 300 feet of the property boundaries.

- | | | |
|---|---|--|
| ☐ Wetlands | ☐ Wellhead Protection Area | ☐ Aquifer Recharge Area |
| ☐ Lakes/Ponds | ☐ Habitat Corridor | ☐ Flood Zone |
| ☐ Streams/Creeks
<i>Waterbody name:</i> _____ | ☐ Habitat Conservation Area | ☐ Flood Classification: _____ |
| ☐ Puyallup River Shoreline
<i>Shoreline Classification:</i>
☐ Conservancy | ☐ Seismic Hazard Area | ☐ Volcanic Hazard Area |
| ☐ Rural | ☐ Clarks Creek Shoreline
<i>Shoreline Classification:</i>
☐ Conservancy | ☐ Landslide/Erosion Hazard Area |
| ☐ Urban | ☐ Rural | <i>Slope Classification:</i>
☐ Slopes 0% - 15% |
| | ☐ Urban | ☐ Slopes 16% – 39% |
| | | ☐ Slopes 40% or Greater |

Please describe the critical areas checked above and their location in relation to the proposed development. Please show their location on any plans to be submitted:

Do you know of any present or past critical area studies that have been conducted for critical areas on-site or adjacent to the site? Please describe below; including their date, scope, conclusions, and parcels they included:

Critical Area Identification *(continued)*

Do you know if any critical areas have been placed inside a tract or a protection easement that is recorded on the title or plat for this site or any adjacent site? Please describe below, including name of tract or easement, location, and Puyallup permit number or recording number:

Proposal

1. Name of water area and/or wetlands within which the development is proposed.

2. Current use of the property with existing improvements.

3. Proposed use of property.

4. Provide a brief narrative describing the general nature of the improvements and land uses within one-thousand (1,000) feet in all directions from the development site.

5. Nature of the existing shoreline. Describe the type of shoreline such as marine, stream, lake, lagoon, marsh, bog, swamp, floodplain, floodway, delta; type of beach such as accretion, erosion, high bank, low bank, or dike; material such as sand, gravel, mud, clay, rock, riprap; the extent and type of bulkheading (if any).

6. In the event that any of the proposed buildings or structures will exceed a height of thirty-five (35) feet above the average grade level, indicate the approximate location of and number of residential units, existing and potential, that will have an obstructed view.

7. Chapter 6 – F & G of the Shoreline Master Program outline uses and development that may be conditionally permitted. What conditional use is being applied for? In the case that a variance is also included in this application, what is the variance proposed to deviate from?

Submittal Checklist

1. Completed and Signed Application Form
2. Vicinity Map: show the proposed site and its geographic relationship to major natural and built features (streets, water bodies, etc.) within one (1) mile in all direction from the site.
3. Detailed Site Plan, containing the following:
 - The site plan should show the property's lot dimensions, boundaries, tax assessor's parcel numbers and square footage.
 - North Arrow and Graphic Scale: The site plan should be drawn on a 24" x 36" sheet using conventional cartographic techniques such as providing a north arrow (top or left reading on the sheet) and graphic scale. The following scales are suggested:
 - 1" = 20' (sites under 4 acres)
 - 1" = 50' (sites 4 acres or larger)
 - Existing Conditions Data: The plan should locate and identify structures and conditions (natural and built) that exist on-site prior to development; include such items as buildings, roads, paved areas, water courses, significant vegetation, underground tanks, points of connection to utility systems, and fences; the plan should also depict existing adjacent structures and conditions such as public or private roads; parking

areas, railroad tracks, water courses, ordinary high water mark (OHWM), a line 200 feet from the floodway, etc; and the plan should show the adjacent existing land uses (residential, commercial, etc), and zoning designations.

- Existing Easements: The plan should locate and show the dimensions of all easements on the site; indicate the easement holder and purpose.
- Proposed Structures Data: The plan should clearly identify and locate all proposed structures including height and dimensions of all buildings, decks and fences; the plan should also show dimensions from the proposed structures to property lines, distances between buildings, and main door locations; the plan should indicate the proposed location of fences, walls, underground tanks, refuse collection areas, etc; the plan should also show areas reserved for future building, if known.
- Proposed Traffic Access, Circulation and Paved Areas: The plan should locate and identify proposed parking areas, driveways, public streets (to be dedicated); also show dimensions of parking stalls, aisles, driveways, and sidewalks; show type of pavement; show wheel stops and curbs; show provisions for handicapped parking and access ramps.
- Proposed Landscape Areas: The plan should identify and locate areas proposed for landscaping and open space and indicate the coverage of landscaping and a percentage of the overall site size. It is not necessary to indicate size and species of plants for 'preliminary' site plan review, although, if available, this information is encouraged.
- Proposed Lighting: The plan should indicate the location and type of proposed lighting fixtures for developments adjacent to residential areas; plans should also show shielded light fixture locations.
- Existing Contours and Finished Grade: The plan should show existing contours at an interval appropriate to depict the underlying land structure (usually 2'); the plan should also show finished grades depicted either by contour or contour/spot elevation. A separate grading plan may be necessary for projects with major grading/topographic features.
- Building Data: The plan should show the following information about the proposed buildings:
 - 12.1. building occupancy division by use (office, shop, etc);
 - 12.2. total building area;
 - 12.3. type of construction per Uniform Building Code; and
 - 12.4. any hazardous materials proposed for storage or use in the building.
- Site Data: The plan should furnish the following information about the proposed site development:
 - 13.1. number of dwelling units (residential developments only);
 - 13.2. number of parking spaces provided (by type: handicapped, etc); and
 - 13.3. total impervious surface (square footage).

4. Preliminary storm water information: The City has currently adopted the 2019 Ecology Manual. All development applications must comply with the 2019 Stormwater Management Manual for Western Washington (SWMMWW).

- Geotechnical Report drafted by a licensed professional soils scientist or other suitably trained person working under a professional engineer, geologist or hydro geologist. The report shall include an evaluation for the site's infiltration capabilities and groundwater elevation during the wet season (December 21st – March 21st)
- Preliminary Drainage Report stating how the project is proposing to mitigate stormwater runoff by the development and meeting the minimum requirements of the currently adopted Ecology manual. This report shall explain how the site will feasibly manage stormwater runoff.
- Stormwater Site Plan showing the relative location and size of the Best Management Practice(s) proposed on the site.

5. Traffic Scoping Worksheet

6. Landscaping/screening plans (if applicable):

- The plan should identify and locate areas proposed for landscaping and open space and indicate the coverage of landscaping and a percentage of the overall site size. It is not necessary to indicate size and species of plants for 'preliminary' site plan review, although, if available, this information is encouraged.

- 7. Critical Area Report
- 8. Environmental Checklist (as applicable)
 - [Flood Habitat Assessment](#)
 - [Fish and Wildlife Assessment](#)
 - [Mitigation Plans](#)
 - [Wetlands](#)
- 9. [SEPA Checklist](#) (if applicable)

Certification

I hereby state that I am the applicant listed above and certify that all information contained above and in exhibits attached hereto is true and correct to the best of my knowledge and belief and is submitted for consideration by the City of Puyallup, pursuant to the provision of the Puyallup Municipal Code. It is understood that the processing of this application may require additional supporting evidence, data, or statements.

Right of Entry: By signing this application the applicant grants unto the City and its agents the right to enter upon the premises for purpose of conducting all necessary inspection to determine compliance with applicable laws, codes, and regulations. This right of entry shall continue until a certificate of occupancy is issued for the property.
