If yes, list signs of inflow or infiltration: _____

Recommendations/repairs needed/misc. notes:

Per Eddystone Borough Ordinance #673: Any residential or commercial property transfer requires a sewer lateral camera inspection. The inspection must be done by a certified NASSCO or PHCC -PSLI inspection company. The inspection must be recorded on a USB thumb drive, borough provided sewer form completed and turned into borough for review. A check for \$85.00 made out to Borough of Eddystone must be submitted for the review fee. Reviews may take up to 5 business days so please leave enough time for your transactions. If the sewer has deficiencies and fails, the property can still settle with a conditional use and occupancy. The new owner has 30 days after settlement to make repairs/replacements. If the borough plumbing inspector finds the sewer totally inadequate, it becomes a health and welfare issue and no property shall be occupied. Failure to comply with these stipulations will result in citations. Any questions or concerns should be directed to our Borough Plumbing Inspector Evan J. Hosbach 610-291-0950.
