NOTICE TO BUILDING PERMIT APPLICANTS

New York State Labor Law (Article 10, Section 241section 241.10) and Industrial Code Rule 56 require a survey of the impacted portion of the building to identify the presence of asbestos prior to commencing work on any demolition, renovation, remodeling or repair work on a building.

The Code requires that this survey be sent to the local government unit responsible for issuing the demolition or building permit.

A demolition or pre-demolition survey must also be sent to the Department of Labor, Asbestos Control Bureau.

Prior to the commencement of demolition, renovation, remodeling or repair work, the impacted asbestos identified in the survey must be removed by licensed contractors utilizing certified asbestos handlers.

In an owner-occupied single family home, the owner may remove the asbestos him/herself. However, it is not recommended that the owner remove asbestos. The owner could potentially expose themselves, their family and neighbors to asbestos fibers if correct engineering controls and work methods are not utilized during the abatement.

This exemption does not apply to demolitions.
