Signature of Property Owner

Regulations

1. Sprinkler systems shall be equipped with a Water Sense labeled irrigation controller and shall be in compliance with Section 2.5(g) of the Illinois Plumbing License Law [225ILCS 320].
2. An RPZ valve must be installed on the sprinkler line of the residence or business at the connection to the water system outside of the home a minimum of eighteen (18) inches above grade.
3. Submit two copies of plans of sprinkler system layout along with this application.
4. Label all Zones and the number of Gallons per Minute used per zone and the total GPM on the plans.
5. Contractor must notify Public Works Department 48 hours prior to commencing work to schedule an inspection.
6. Sprinkler system to be electrically timed so that each zone is regulated as not to deprive water service of proper volume and pressure to satisfy demands of the water user.
7. Sprinkler timers must be set to match the Village Ordinance regulating sprinkling hours.
8. No chemicals are to be fed into sprinkler system.
9. No pump is to be connected to the sprinkler system.
10. No sprinkler heads can be placed in drainage, utility, or conservation easements.
 - **Automatic Sprinkler System – time/day restriction: May 15-September 15 between 12 a.m. (midnight) and 5:00 a.m. on odd/even days according to the last digit of the street address.
 - **The law prohibits irrigation usage on the consecutive days on the 31st and 1st days of the month.
 - ** These restrictions can be changed at anytime due to drought conditions. Please check our website at www.palospark.org for up to date sprinkling restrictions.
