

BUILDING DIVISION INFORMATION SHEET

Smoke/CO Alarm Self Verification Form

Building Permit # _____

The California Residential Code requires smoke alarms as well as carbon monoxide (CO) alarms to be installed in dwelling units when building permits are issued and the scope of work exceeds a total cost or calculated valuation of \$1,000. The installation is required regardless of whether the work performed is interior or exterior. In order to grant final approval of your permit, it is necessary to verify the installation of these alarms. This form provides the ability for you to self-verify when work performed does not allow convenient access to the interior of the dwelling.

As of January 1, 2014, all new and replacement battery operated smoke alarms must be equipped with a non-replaceable, non-removable battery capable of powering the alarm for 10 years. All existing smoke alarms will have to be replaced 10 years after the date of manufacture. If the date of manufacture cannot be determined, the alarms should be replaced as soon as possible with the new type.

By signing this document, you are certifying to the City of Cotati Building and Safety Division that both smoke alarms and CO alarms have been installed on the above referenced project as specified below:

Smoke alarms are installed in accordance with the approved manufacturer's instructions in all of the following areas: each sleeping unit, in hallways of areas providing access to the sleeping units, on each floor (if multi-story), and in the basement (if one exists).

Carbon Monoxide alarms are installed in accordance with the approved manufacturer's instructions in all of the following areas: where fossil fuel burning appliances are installed (including fireplaces), outside each sleeping area in the immediate vicinity of the bedrooms, on every floor of the dwelling unit (if multi-story), and in the basement (if one exists).

Please fill in the requested information, including the permit number and return the form by email to cduncan@cotaticity.gov
Alternatively, this form may be submitted to the building inspector at the time the final inspection is performed.
