TERMS OF SERVICE

Service Agreement terms between the City of Morgan's Point Resort (a City organized under the laws of the State of Texas) and _____ (Applicant and/or Resident). The purpose of this service agreement is to notify each customer of the plumbing restrictions in place to provide protection. The utility enforces these restrictions to ensure the public health before the City of Morgan's Point Resort will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.

The City shall sell and deliver water services to the Applicant and the Applicant shall purchase, and/or reserve water service from the City in accordance with Ordinance 16-5K of the City as amended from time to time by the City Council. Upon compliance with said policies, including payment of Water Deposit, Tap Fee and Service Charges.

The City shall furnish and install meters for the purpose of metering all water. The meter and/or connection is for the sole use of the Customer and is to serve water to only one (1) dwelling and/or one (1) business. Extension of pipe or pipes to transfer water from one property to another, to share, resell, or sub-meter water to any other person, dwelling, business, and/or property, etc., is prohibited.

The Resident shall install at his own expense a service line from the water meter to the point of use, including any customer service isolation valves and other equipment specified by the City. The use of pipes and pipe fittings that contain more than 8 % lead or solders and flux that contains more than 0.2% lead are prohibited for any plumbing installation or repair of any residential or nonresidential facility providing water for human consumption.

By execution hereof, the Resident shall hold the City harmless from any and all claims for damages caused by service interruptions due to waterline breaks by utility or like contractors, tampering by other Residents/Users of the City, normal failures of the system, or other events beyond the City's control. No direct connection between the public drinking water supply and potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device. No cross-connection between the public drinking water supply and private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or an appropriate backflow prevention device. No connection allowing water to be returned to the public

drinking water supply is permitted.

The Resident shall grant to the City, now or in the future, any easements of right-of-way for the purpose of installing, maintaining, and operating such pipelines, meters, valves, and any other such equipment deemed necessary by the City to extend or improve service for existing or future Residents, on such forms as required by the City.

The City shall have the right to locate a water service meter and the pipe necessary to connect the meter on the Resident's property at a point to be chosen by the City Public Works Director, and shall have access to its property and equipment located upon Customer's premises at all reasonable times for any purpose connected with or in the furtherance of its business operations, and upon discontinuance of services the City shall have the right to remove any of its equipment from the Resident's property.

The City's authorized employees shall have access to the Resident's property or premises at all reasonable times for the purpose of inspection for possible violation of the City's policies or Texas Department of Health Rules and Regulations. The City strictly prohibits the connection of service pipelines from its water service meter to any private well or unknown water supply.

By execution of this Service Application and Agreement, the Applicant shall guarantee payment of all the other rates, fees, and charges due on any account, for which said Applicant owns an account. Said guarantee shall pledge any and all deposits against any balance due the City. Liquidation of said deposits shall give rise to the discontinuance of water utility service under the terms and conditions of the City's Tariff.

By execution of this Service Application and Agreement, Applicant agrees that noncompliance with the terms of this Agreement by said Applicant shall constitute denial or discontinuance of service until such time as the violation is corrected to the satisfaction of the City.

Any misrepresentation of the facts by the Applicant of this agreement shall result in termination of service pursuant to the terms and conditions of the City's Tariff.
