GENERAL INFORMATION

The Final Plat is last step in the subdivision process. The final plat includes the survey description for each lot in the plat plus plat notes and dedication, recording and approval statements. The final plat is the “recorded document” that is filed for record with the county.

- **An approved Concept Plan and Preliminary Plat is required prior to submission of a Final Plat. A Final Plat is required for all subdivisions except those that qualify as a Short Form Final Plat or Amended Final Plat.**
- Construction plans may be submitted for review and approval simultaneously with a Final Plat only if the applicant elects to seek approval under the Alternative Review/Expedited Procedure. In addition, the Final Plat shall not be approved until the Construction Plans have been approved. If the Construction Plans and the Final Plat are to be reviewed simultaneously, a complete application for Construction Plans and a complete application for Final Plat must be submitted to the City simultaneously.
- If the final plat does not conform to the approved preliminary plat, a redline document identifying all changes shall be provided and approved prior to the submittal of the final plat application. Staff will determine if the changes require a formal revision to the preliminary plat.
- If changes to the street names are proposed after the approval of the Preliminary Plat, then documentation from both Williamson and Travis County 911/Addressing stating that all street names on the Final Plat are approved and not duplicated in other areas of the counties.
- The required level of traffic study determined by the Traffic Study Screening Evaluation Form is to be completed with the Concept Plan or first land development application for the development.
- If the traffic study assumptions in the approved traffic study have changed, an updated Traffic Study Screening Evaluation Form is required with this submittal ([page 24](#)). This application includes a Traffic Level Study Guide to provide assistance with this form ([page 22](#)). Review of the Traffic Study Screening Evaluation Form will determine whether an update to the traffic study is required. Any fees in lieu of a TIA (only if approved by City Engineer during the concept or preliminary plat prior to January 2024) or payments associated with a traffic study as approved by the City Engineer are due prior to scheduling the final plat for review by the Commission for residential plats that do not require a site plan. Fees in lieu of a TIA or payments associated with a traffic study are due at the site development stage for non-residential, multi-family, or residential plats that require a site plan (only if approved by City Engineer during the concept or preliminary plat prior to January 2024).
- All fees such as TIA fee in lieu, payments associated with a traffic study, parkland fee in lieu, recreation improvement deposit, roadway adequacy payment, etc are due prior to scheduling the plat for review by the Commission.
- Action by the Planning & Zoning Commission and/or City Council is required if one of the following items apply:
 - A variance is requested;
 - A replat of residential property is proposed;
 - Significant and/or Heritage Tree(s) are proposed for removal and action by the governing body is required; and/or
 - The Director of Planning, for any reason, elects to present the application to the Commission and/or Council for action.

Only projects that are subject to the Alternative Review Procedure are eligible for this process. Instead of providing a formal submittal, the applicant may submit the items listed below for an expedited review. Projects are eligible for final submittal review when there are only a few minor comments remaining. Staff will notify the applicant in the comment letter when they are eligible.

Items to submit through the Development Hub:

- ☐ Final Plat (18" X 24") pdf
- ☐ A comment response letter indicating how the staff comments were addressed.

FINAL APPROVAL

After the review is complete and staff has cleared all comments, staff will take the next steps in the approval process. If the application is eligible for administrative approval, the Planning Director will sign the final plat after the subdivision construction is complete or fiscal is posted for the improvements. If the application requires a hearing, staff will initiate the hearing process.

The following items are required to be submitted through the Development Hub to start the approval process.

- ☐ Final Plat (18" X 24") pdf

TRAFFIC STUDY LEVEL GUIDE

NOTES:

1. This document is a companion to the Traffic Study Screening Evaluation Form and is a general overview of the traffic study level requirements for all projects.
2. A Traffic Study Screening Evaluation Form must be submitted with every proposed land development application.
3. City staff will review the screening form and determine the level of traffic study required based on the complexity of the proposed development and the threshold of projected added traffic from the proposed development, utilizing the latest edition of the ITE Trip Generation Manual.
4. All submitted technical letters, technical memoranda, analysis, and traffic impact analysis reports must be signed and sealed by a licensed professional engineer registered in the state of Texas or other qualified individual responsible for the supervision and preparation of the traffic study.
5. All traffic studies, except Level 0, will require a scoping meeting with City of Leander staff prior to preparation of the study.
6. Submittals of Traffic Studies for Levels 0, 1 and 2 will be submitted through the Development HUB as part of each land development application review. The initial land development application submittal will only require the Traffic Study Screening Evaluation Form. Subsequent review submittals will require the Traffic Study to be submitted as a review document. No separate traffic study application or review fee is required for Traffic Study Levels 0, 1, or 2.
7. Submittals of Traffic Studies for Levels 3 and Level 4 will require a separate Traffic Impact Analysis (TIA) Submittal Packet, and corresponding review fee, submitted through the Development HUB. The TIA Submittal Packet is available on the City Website.
8. All Traffic Studies shall expire after 5 years from the initial submittal date, and will be reevaluated, as determined by City Staff, for any updates required to the traffic study and recommended mitigating improvements.

LEVEL 0 {0 to 49 peak hour Trips, OR 0 to 249 new Daily trips}

This study level requires a project letter that includes a general project description and serves as documentation of the projected daily trips expected with the proposed land use development. The letter should also include any observations or recommendations needed with the proposed land development to address the safety and efficiency of the adjacent roadways, intersections, existing and proposed access points.

LEVEL 1 {50 to 99 peak hour Trips, OR 250 to 999 new Daily trips}

This study level requires a brief engineering study to evaluate the existing conditions, operational efficiency, and safety of the adjacent roadways, intersections, and access points for the proposed land development, including access spacing, turn lanes, sight distance, and existing condition conflicts. Study may include the following elements as necessary: existing traffic, trip distribution, capacity analysis, traffic assignment at the proposed access points, and any recommendations. The submittal should be in the form of a technical letter or memorandum with supporting exhibits.

LEVEL 2 {100 to 299 peak hour Trips, OR 1,000 to 4,999 new Daily trips}

This study level requires an engineering study to evaluate the existing conditions, operational efficiency, and safety of the adjacent roadways, intersections, existing and proposed access for the proposed land development. The analysis should include access spacing, turn lanes, sight distance, existing condition conflicts, safety, capacity analysis, and operational impacts of the proposed land development on the existing roadway, adjacent driveways, access points, and nearby intersections. The study should also include the following elements as necessary: existing traffic counts, trip distribution and traffic assignment at the proposed access points, queueing and circulation analysis and recommended mitigations. The submittal should be in the form of a technical memorandum and other supporting documentation including exhibits, diagrams, tables, and analyses.

LEVEL 3 {300 to 699 peak hour Trips, OR 5,000 to 10,000 new Daily trips}

This study level requires a Traffic Impact Analysis (TIA). The TIA shall be performed according to the requirements of the City of Austin's Transportation Criteria Manual, dated 2020, and as determined during the TIA scoping meeting with City of Leander staff prior to beginning the study. The submittal should be in the form of a full engineering report including executive summary, written analyses, exhibits, graphics, figures, tables, existing traffic counts, background traffic, traffic growth projections, trip distribution, safety and operational impacts, capacity analysis, recommended mitigations, conclusions, appendices materials as necessary including traffic count data, traffic modeling printouts, and Synchro files.

LEVEL 4 {≥ 700 peak hour Trips, OR ≥ 10,000 new Daily trips, or ≥ 100 acres}

This study level requires a Traffic Impact Analysis (TIA) following the same requirements as a Level 3 Traffic Study above, but for a large, proposed master planned land development with multiple phases over several years. The Level 4 TIA submittal should follow the content requirements of a Level 3 traffic study, but with the additional expectation the study and recommended mitigations will need to be reevaluated and tracked at each phase, including a recommended timeframe for installation of the improvements, and refined and amended as the project evolves for the individual developments.
