BEEKEEPING PERMIT APPLICATION

In accordance with Village of Red Hook Municipal Code §200-18.1 -
Animal husbandry, hens and honeybees

Date: _____

Applicant Name: _____

Applicant Address: _____

Parcel ID#: 6272-_____-_____

Phone: _____ Email: _____

SITE ADDRESS: _____

Emergency Contact Information:

Name: _____

Phone: _____

Number and location of hives on the property

HIVES: _____

Location: Rear Yard: _____ Side Yard: _____

Details:

(Please provide a sketch drawing with this application as per Village Code §200-18.1)

The following are required with this application:

1. \$25.00 application fee - cash or check (checks payable to the "Village of Red Hook")
 2. If not the owner, a notarized letter from owner authorizing the keeping of bees
 3. A dimensioned sketch drawing of the lot showing the following:
 - location and all setbacks
 - location of water source
 - location of warning sign (within 20 feet of the hive(s)) * MUST PROVIDE A PICTURE *
 - location and height of all barriers
 - Proof of neighboring notification (please provide a list of all neighboring properties that received mailed notification)
-

I hereby acknowledge that this information is complete and accurate; that the work will be in conformation with §200-18.1 of Village of Red Hook Municipal Code; that I understand this is not a permit but only an application for a permit. I acknowledge that the structures will be constructed in accordance with the approved sketch plans. **This permit will be valid for 12 months from the date of issuance. permit holder will be responsible for obtaining a renewal beekeeping permit.**

I hereby acknowledge that if bees existed prior to adoption of Village of Red Hook §200-18.1 (June 22, 2023) that I have 90 days from effective date to come into compliance with this Local Law.

I hereby acknowledge that effective December 23, 2021 all beekeepers in NYS are required to register with the New York State Department of Agriculture and Markets.

I hereby acknowledge that I have read the Village of Red Hook Municipal Code §200-18.1 - Animal husbandry, hens and honeybees.

BEEKEEPER REGISTRATION

Keep Us Apprised of Your Bee's Health

Honey bee health is a critical issue today. The Department's Division of Plant Industry strives to assist beekeepers in maintaining their colonies in a healthy condition. Through inspection, certification, education, and outreach to beekeepers, the Division works to ensure the health of honey bees.

As of December 23, 2021, all beekeepers in New York State are required to register with the Department and to renew their registration annually. Beekeepers must also indicate if they intend to sell nucleus (nucs) colonies.

Please click the link below to get registered. For more information please contact State Apiculturist Joan Mahoney at joan.mahoney@agriculture.ny.gov.

Register: <https://beekeepers.agriculture.ny.gov/registration>

§ 200-18.1. Animal husbandry, hens and honeybees. [Added 6-22-2023 by L.L. No. 2-2023]

- A. Animal husbandry. Animal husbandry for personal noncommercial use is permitted as an accessory use to a residential use with site plan approval in the R10,000 and R20,000 Zoning Districts on a lot with a minimum area of two acres, subject to the following limitations and restrictions.
- (1) Animals shall be confined at all times to the lot on which they are kept, possessed or maintained. Animal husbandry shall not be conducted within 75 feet of the lot boundary.
 - (2) The number of animals that may be kept on a property is as follows: one animal with an average weight of 250 pounds or more at mature size or two animals with an average weight of less than 250 pounds each at mature size per 1.5 acres of available land, regardless of the actual size or age of the animal. "Available land" is defined as all land on a lot, excluding the residence, driveway, garage, other buildings or structures not used for animal husbandry, and all areas within 50 feet of wells, watercourses and wetlands.
 - (3) Adult male animals shall be neutered; breeding of animals is not permitted.
 - (4) Feed shall be stored indoors or in metal containers and securely covered with metal covers.
 - (5) Animal waste and uneaten or discarded food must be disposed of in a safe and sanitary manner with a minimum frequency of once per week. There shall be no unenclosed storage or manure or other odor- or dust-producing substances.
 - (6) Odor from animals, animal waste and related substances shall not create a nuisance for occupants of nearby buildings or properties.
- B. Keeping of hens. The keeping of hens for personal noncommercial use is permitted as an accessory use to a residential use in the R10,000 and R20,000 Zoning Districts subject to issuance of a permit from the Code Enforcement Officer and further subject to the following rules.
- (1) All hens shall be provided with an enclosed shelter and a fenced run inaccessible to predatory animals. The shelter and fenced run shall be located behind the front building line of the residence and set back from the property boundary not less than the accessory building setback required in the District Schedule of Area and Bulk Regulations for the applicable zoning district.
 - (a) The fenced run shall be fully screened from view from any neighboring front yard by an opaque fence, shrubbery, or other screening of a height equivalent to the structure being screened.
 - (b) The enclosed shelter shall provide a minimum floor space of four square feet per hen. The fenced run shall have a minimum of eight square feet per hen.
 - (2) The shelter shall be maintained in a clean, dry and sanitary condition at all times so as not to endanger the public health and safety. Animal waste, uneaten or discarded food, and feathers are to be removed regularly with a minimum frequency of once per week.

- (3) Feed shall be stored indoors or in metal containers and securely covered with metal covers.
 - (4) Hen waste must be disposed of in a safe and sanitary manner with a minimum frequency of once per week or may be composted on site with sufficient green vegetation and soil so as to prevent odors from leaving the property.
 - (5) Odor from hens, hen waste and related substances shall not create a nuisance for occupants of nearby buildings or properties.
 - (6) Hens shall be confined at all times to the lot on which they are kept, possessed or maintained. Free-range hens are prohibited.
 - (7) No more than six hens are permitted on a lot of an acre or less and no more than 12 hens are permitted on a lot of more than one acre.
 - (8) The keeping of fowl other than hens, including but not limited to roosters, ducks, geese, turkeys, guinea fowl, peacocks and peahens, is not permitted.
 - (9) A nontransferable license shall be obtained from the Code Enforcement Officer prior to the keeping of hens on a lot and shall be subject to an annual renewal.
 - (a) If an applicant is not the owner of the lot the license application shall be accompanied by a notarized letter from the owner authorizing the keeping of hens.
 - (b) Prior to issuance of the license, the CEO shall inspect the premises and confirm in writing that the standards in § 200-18.1B are met.
 - (c) The Village Board may establish by resolution a fee for each license and renewal thereof.
- C. Keeping of honeybees. The personal noncommercial keeping of honeybees shall be permitted as an accessory use to a residential use in the R10,000 and R20,000 Zoning Districts, subject to issuance of a beekeeping permit from the Code Enforcement Officer and further subject to the following rules.
- (1) Hive type. All honeybee colonies shall be kept in hives with removable frames, a maximum of 10 frames per box, or equivalent, to control total bee density (or five frames or equivalent for a nucleus colony defined as a hive with a queen installed at the discretion of the beekeeper to better facilitate the health and vitality of the entire bee colony), such box to allow disassembly for complete internal hive inspection at all times by the Village Building Inspector, Code Enforcement Officer, Village Engineer, Village designee, or any other governmental agency with jurisdiction.
 - (2) Site colony density.
 - (a) A maximum of two colonies, consisting of no more than three hives, shall be permitted per lot.
 - (b) Should hives swarm, the beekeeper may add a temporary hive(s) to accommodate same. If this exceeds the maximum permitted site density, the hives must be

merged during the calendar year to an allowed density.

- (c) In no event will the overwintering of colonies exceeding the maximum total allowed permitted.
- (3) Colony location. All colonies must be located at least 50 feet from a public sidewalk, alley, street or road and at least 25 feet from a side or rear lot line. All colony entrances shall face inward to the site and away from the nearest adjacent property boundaries. A dimensioned sketch of the lot showing location and all setbacks shall be included with the application for a beekeeping permit.
- (4) Control barrier.
 - (a) The beekeeper must establish a flyaway barrier adjacent to hives controlling the honeybee flight path away from the lot. This should be at least six feet tall and extend 15 feet beyond the colony on each boundary side. It can be solid, vegetative or any combination of the two that forces the honeybee's flight path along the lot line at a height of six feet or more.
 - (b) A warning sign must be within 20 feet of the hives to warn people and children from coming in close contact with the hives without supervision.
- (5) Purchasing and keeping of bees and queens; honeybee genetics and defensive behavior.
 - (a) Beekeepers pursuing the purchase and keeping of bees must be mindful of honeybee genetics and defensive honeybee behavior. Thus, before the purchase of bee packages or queen bees, whether to start, replace or maintain colonies, beekeepers must act responsibly to limit the spread of Africanized (defensive) and any other undesirable bee genetics. Accordingly, every effort should be made to utilize bees or queens from northern apiaries to limit the spread of the Africanized bee genetics. Applicants should include documentation to verify apiary origin of mated queens and packaged bees, including the seller's contact information.
 - (b) Any colony of honeybees exhibiting defensive or angry behavior must be re-queened immediately. The beekeeper will make every effort to minimize colony disruption after the defensive or angry behavior determination. The beekeeper will also use good practices to minimize/prevent a defensive colony swarming.
 - (c) All existing and new apiaries will meet the required colony density. All existing and new colonies will be managed to meet the spirit and intent of these provisions, in the judgement of the Building Inspector, Code Enforcement Officer, Village Engineer or Village designee, who retain the authority to cancel the beekeeping permit if these standards are not met. In such an event, if in disagreement, the beekeeper shall have 30 days to appeal said cancellation to the Zoning Board of Appeals.
- (6) Water. Each beekeeper shall ensure that a convenient source (within colony property area and near the hive or hives) of water is available to the bees in sufficient quantity as a function of number of hives, specifically at any time during the year when temperatures are regularly 50° F. or higher and the bees are active.

- (7) Absence. The beekeeper shall maintain a log on site recording significant hive activities (such as disease infestation). If the beekeeper does not reside on the property, or plans to be away, he/she or a knowledgeable representative shall visit same no less frequently than approximately weekly during the months of higher bee activity, and approximately bimonthly at other times except if specific circumstances necessitate more frequent attention. The beekeeper shall provide contact information in case of an emergency. The on-site log shall reflect having met this regulation, and shall be made available for review by the Village or any person with authority to inspect the hives.
 - (8) A nontransferable license must be obtained from the Code Enforcement Officer prior to the keeping of honeybees on a lot and shall be subject to an annual renewal.
 - (a) Each application and renewal application shall be accompanied by information on the number of hives and colonies and their location.
 - (b) If an applicant is not the owner of the lot the license application shall be accompanied by a notarized letter from the owner authorizing the keeping of honeybees.
 - (c) Prior to issuance of the license, the CEO shall inspect the premises and confirm in writing that the standards in § 200-18.1C are met.
 - (d) The Village Board may establish by resolution a fee for each license and renewal thereof.
 - (e) The initial license application and each renewal application shall require the applicant to provide notice of beekeeping activity to adjacent property owners. Such notice shall include the applicant's contact information in the event that there are questions or concerns.
 - (9) Incidental sales of honey from the hives may be permitted by the beekeeper.
- D. It shall be unlawful to cause, permit or allow any animals, hens or honeybees to be kept in such a manner as to constitute a nuisance or to create a hazard to public health or in any manner which either annoys, disturbs, injures or endangers, or tends to annoy, disturb, injure or endanger the comfort, repose, health, peace or safety of the public.
- E. Compliance requirements.
- (1) Owners of hens, honeybees or other animals other than household pets existing on a lot within the Village at the time of adoption of this section shall have 90 days from the effective date to come into compliance with the provisions of this section and obtain a license or site plan approval.
 - (a) Existing hives, chicken coops and other structures which are noncompliant by exceeding the maximum permitted size or coverage may continue to be used provided that all other approvals and licenses are obtained, but shall not thereafter be enlarged.
 - (b) Any owner of hens, honeybees or other animals (other than household pets) who exceeds the permitted number of such hens, honeybees or other animals (other than

household pets) at the time of adoption of this local law¹ may apply to the Planning Board for a special use permit to allow the hens, honeybees or other animals (other than household pets) to remain.

- (c) The size limitations regulate the use of the residential lot and the Zoning Board of Appeals is without authority to issue an area variance to permit an increase in the number of hens, honeybees or other animals (other than household pets) permitted on a lot.
 - (2) Any agricultural activities conducted on properties in an agricultural district may be exempt from these restrictions if so provided by Agriculture and Markets Law Article 25-AA, as amended.
- F. Inspection. The Village of Red Hook, or its designee, or any governmental agency with jurisdiction shall have the right to inspect animal enclosures and beehives at any time with 24 hours' notice, except in an emergency, when notice shall be given to the extent practicable.
- G. Violations. In addition to the penalties in Article VII of the Zoning Law:
- (1) A license for the keeping of hens or bees shall be automatically revoked for a period of two years upon conviction of a second offense and no new license for the same property or owner shall be issued for a period of two years from the date of conviction.
 - (2) A beekeeping permit shall be revoked if the beekeeper fails to maintain the colony in a safe and secure manner.

1. Editor's Note: "This local law" refers to L.L. No. 2-2023, adopted 6-22-2023.
