

Pennsville Township Water Department

Water Service Line Material Questionnaire *Please Return by November 31, 2024*

As required by the State of New Jersey, the Township of Pennsville is preparing an inventory of all water service pipes and the service pipe materials. The Township is requiring all property owners to complete and submit this Questionnaire for each property and each water service you have. If you have multiple properties and/or multiple services, please make additional copies of this form for each service. *Note: this survey does not require digging or exposing of your water service in your yard.*

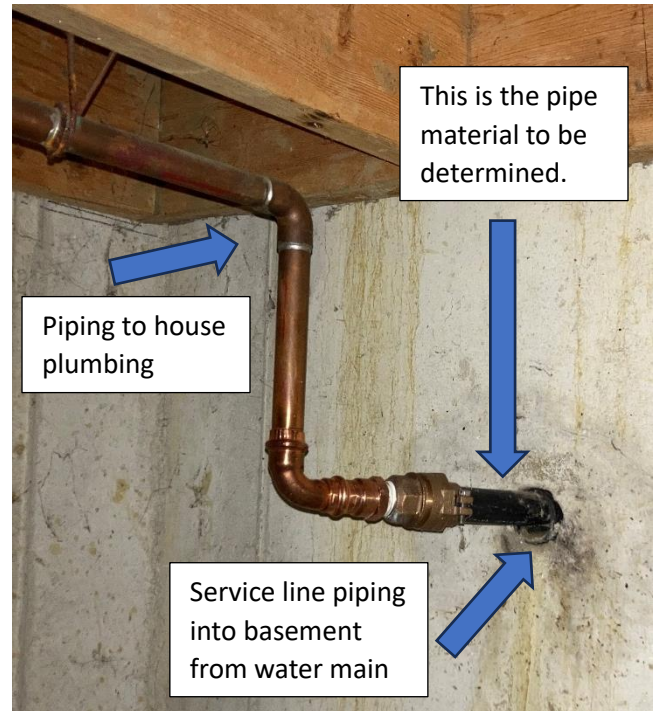

Owner Name _____

Mailing Address _____

Service Address _____

Service Block _____ & Lot _____

Year Dwelling/Structure Was Built _____

Piping Material Where Water Service Enters Dwelling (mark type below)

Please return this questionnaire via fax: 609-861-7008, email: info@etsengineersconsulting.com, or regular mail to: Environmental & Technical Services, P.O. Box 608, Woodbine, New Jersey 08270.

Possible Pipe Materials

Galvanized Steel

Lead

Plastic

Copper

Lead

A dull, silver-gray color that is easily scratched with a coin. Use a magnet—strong magnets will NOT cling to lead pipes.

Galvanized

A dull, silver-gray color. Use a magnet—strong magnets will typically cling to galvanized pipes.

Copper

The color of a copper penny. Copper line will usually have bends on it.

Plastic

A rigid pipe—usually white or blue in color.

Brass

Dark reddish brown to a dull yellow color. Rigid pipe.
