Depending on the complexity of the request, a response will be sent by seven (7) business days following receipt by COLC. Please keep this in mind when trying to ensure that you meet your own project timelines. The response will include a determination of the adequacy of the existing facilities to serve the proposed development based upon the information supplied above. Should adequate facilities not exist, you may additionally request an FID (Facilities Improvement Determination) Study be conducted by our Engineering Department that will determine the required upgrades you would be responsible for installing in order to support your development. If you wish to have this study conducted, you may submit a request in writing and the Engineering Department will provide a site-specific cost estimate for this study. FID Study documents will be sent within two calendar months following the receipt of the request and payment.
