Does the proposed project fall into one of the following categories? Please check Yes/No

YES NO

LID CATEGORIES

1 Small Scale Residential LID Category

The project is residential, will involve 4 or less dwelling units and will result in development or redevelopment* of more than 500 square feet of impervious* area.

2 Small Scale Commercial/Industrial LID Category

The project will involve 5 or more dwelling units or is at a commercial or industrial site and will result in the development or redevelopment* of more than 500 square feet of impervious* area, but is not an MS4 LID Category project.

3 MS4 LID Category

The project is over 5,000 square feet and falls into one of the MS4 LID Categories* (defined on back).

Note: This category is beyond the scope of this form and is subject to the provisions of the Municipal Separate Storm Sewer System permit (MS4) issued by the California Regional Water Quality Control Board (see Form PC).

4 Exempt Category

The project will disturb less than 500 square feet of soil.

If boxes 1 or 2 are checked YES, this project will require the preparation of a Small Site LID Plan which follows the City of Temple City's *Small Site LID Manual* along with a Maintenance Agreement*

* Defined on back

DEFINITIONS:

Redevelopment: Land-disturbing activities that result in the creation, addition, or replacement of impervious surface area.

Redevelopment does not include routine maintenance activities that are conducted to maintain the original line and grade, hydraulic capacity, or original purpose of facility, nor does it include modifications to existing single family structures, or emergency construction activities required to immediately protect public health and safety.

Impervious: Surfaces that do not allow stormwater runoff to percolate into the ground. Typical impervious surfaces include: concrete, asphalt, roofing materials, etc. However, some specially designed concrete/asphalt allow water to percolate (i.e. pervious pavers).

Maintenance Agreement: All developments subject to Small Site LID requirements must provide verification of maintenance for Structural and Treatment Control BMPs. Verification at a minimum shall include:

- Recorded maintenance covenant; and
- The developer's and/or owner's signed statement accepting responsibility for maintenance until the responsibility is legally transferred; and
- A signed statement from the owner assuming responsibility for Structural or Treatment Control BMP maintenance and conduct a maintenance inspection at least once a year.

MS4 LID Category:

The project is beyond the scope of this form and is subject to the provisions of the Municipal Separate Storm Sewer System permit (MS4) issued by the California Regional Water Quality Control Board (see Form PC). These projects include the following:

- (1) All Development Projects equal to 1 acre or greater of disturbed area that adds more than 10,000 square feet of impervious surface area.
- (2) Industrial Parks with 10,000 square feet or more of surface area.
- (3) Commercial Malls with 10,000 square feet or more of surface area.
- (4) Retail Gasoline Outlets with 5,000 square feet or more of surface area.
- (5) Restaurants with 5,000 square feet or more of surface area.
- (6) Parking Lots with 5,000 square feet or more of impervious surface area, or with 25 or more parking spaces.
- (7) Streets and roads construction with 10,000 square feet or more of impervious surface area. Street and road construction applies to standalone streets, roads, highways, and freeway projects, and also applies to streets within larger projects.
- (8) Automotive Service Facilities with 5,000 square feet or more of surface area.
- (9) Projects located in or directly adjacent to, or discharging directly to an Environmentally Sensitive Area, where the Development will:
 - a. Discharge Stormwater Runoff that is likely to impact a sensitive biological species or habitat; and
 - b. Create 2,500 square feet or more of impervious surface area.
- (10) Single-family Hillside Properties.
- (11) Redevelopment Projects:
 - a. Construction Activity that results in the creation, addition or replacement of 5,000 square feet or more of impervious surface area on an already developed Site of one of the Projects identified in this Subsection.

TYPE OF PROJECT

Does the proposed project fall into one of the following categories? Please check Yes/No	YES	NO
--	-----	----

PRIORITY PROJECTS

1. Development* of a new project equal to 1 acre or greater of disturbed area and adding more than 10,000 square feet of impervious* surface area*	☐	☐
2. Development* of a new industrial park with 10,000 square feet or more of surface area*	☐	☐
3. Development* of a new commercial mall with 10,000 square feet or more surface area*	☐	☐
4. Development* of a new retail gasoline outlet with 5,000 square feet or more of surface area*	☐	☐
5. Development* of a new restaurant (SIC 5812) with 5,000 square feet or more of surface area*	☐	☐
6. Development* of a new parking lot with either 5,000 ft ² or more of impervious* surface area* or with 25 or more parking spaces	☐	☐
7. Development* of a new automotive service facility (SIC 5013, 5014, 5511, 5541, 7532-7534 and 7536-7539) with 5,000 square feet or more of surface area*	☐	☐
8. Projects located in or directly adjacent to, or discharging directly to a Significant Ecological Area (SEA)*, where the development will: a. Discharge stormwater runoff that is likely to impact a sensitive biological species or habitat; and b. Create 2,500 square feet or more of impervious surface area*	☐	☐
9. Redevelopment* of 5,000 square feet or more in one of the categories listed above	☐	☐
10. Redevelopment* of 10,000 square feet or more to a Single Family Home, without a change in landuse.	☐	☐

If any of the boxes 1-10 are checked YES, this project will require the preparation of a Low Impact Development (LID) * Plan with a Maintenance Agreement*

SPECIAL PROVISION PROJECTS

11. Green street* project	☐	☐
12. Single family hillside* home	☐	☐

If any of the boxes 11-12 are checked YES, this project will require the preparation of a plan with special provisions associated with the type of development.

* Defined on back.

DEFINITIONS:

LID: Low Impact Development (LID) is a stormwater management strategy that emphasizes conservation and the use of existing natural site features integrated with stormwater controls to more closely mimic natural hydrologic patterns in residential, commercial, and industrial settings.

Development: Development includes any construction or demolition activity, clearing, grading, grubbing, or excavation or any other activity that results in land disturbance.

Impervious: Surfaces that do not allow stormwater runoff to percolate into the ground. Typical impervious surfaces include: concrete, asphalt, roofing materials, etc.

Hillside: A property where the slope is 25% or greater and where grading contemplates cut or fill slopes. Single family hillside homes will require a less extensive plan. During the construction of a single-family hillside home, the following measures are implemented:

- a. Conserve natural areas
- b. Protect slopes and channels
- c. Provide storm drain system stenciling and signage
- d. Divert roof runoff to vegetated areas before discharge unless the diversion would result in slope instability
- e. Direct surface flow to vegetated areas before discharge unless the diversion would result in slope instability.

Green Streets: Any street and road construction of 10,000 square feet or more of impervious surface area. Street and road construction applies to standalone streets, roads, highways, and freeway projects, and also applies to streets within larger projects. These sites are required to develop a Green Streets Plan with the following provisions:

- a. Follow an approved green streets manual to the maximum extent practicable. Stormwater mitigation measures must be in compliance with the approved green streets manual requirements.

Redevelopment: Land-disturbing activities that result in the creation, addition, or replacement of impervious surface area on an already developed site.

Redevelopment does not include routine maintenance activities that are conducted to maintain the original line and grade, hydraulic capacity, or original purpose of facility, nor does it include modifications to existing single family structures, or emergency construction activities required to immediately protect public health and safety.

Significant Ecological Area: An area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and would be disturbed or degraded by human activities and developments. Also, an area designated by the City as approved by the Regional Water Quality Control Board.

Maintenance Agreement and Transfer: All developments subject to LID requirements must provide verification of maintenance provisions for Structural and Treatment Control BMPs. Verification at a minimum shall include:

- Recorded maintenance covenant; and
- The developer's and/or owner's signed statement accepting responsibility for maintenance until the responsibility is legally transferred; and
- A signed statement from the public entity assuming responsibility for Structural or Treatment Control BMP maintenance and conduct a maintenance inspection at least once a year.

BMP: Best Management Practices (BMPs) are practices or physical devices or systems designed to prevent or reduce pollutant loading from stormwater or non-stormwater discharges to receiving waters, or designed to reduce the volume of stormwater or non-stormwater discharged to the receiving water.

Surface Area: The surface area is the total footprint of an area. Not to include the cumulative area above or below the ground surface.
