SITE PLAN SKETCH

Scale (Check One): ☐ 1 small square = 5 ft.

☐ 1 small square = 10 ft

☐ 1 small square = ft.

Preliminary site plan, with accurate dimensions. Must be done to a specified scale, on grid sheet provided on the reverse side. Plan must show:

Scale at which it is drawn and direction of north;

Location and dimensions of existing and proposed buildings (to include setbacks from property lines)

Location, layout, and dimensions of parking area and driveway (s);

Location of available utilities (hookups or access);

Location of well and septic system;

Location of any proposed outdoor storage;

Location & description of any fencing or vegetative screening;

Location and description of any outdoor lighting;

Direction(s) of slope of land;

Location of all footer drains, roof drains, streams, ditches, catch basins, retention/detention ponds;

Location and description of any business signs

NOTE: For final Site Plan Approval, the Planning Board or Board Of Appeals may require the submission of additional information drawn from the list in Section 608.1 of the Town of Eaton Land Use Law. When the property location does not pose problems for existing neighboring uses; when care is taken in the site design; and when the site does not have serious physical shortcomings; then smaller scale development projects stand a reasonable chance of receiving such Site Plan Approval upon the Planning Board's or Board of Appeal's consideration of a preliminary site plan containing only the above information and the SEQR EAF mentioned below -- typically after a single Planning Board or Board of Appeals meeting. Larger projects or those proposed for environmentally sensitive land will typically require submission of some or all of the items listed in Section 608.1, in addition to the above site plan material. The applicant may either submit all the information listed in Section 608.1 in the initial submission with the application or submit initially only the preliminary site plan and the SEQR EAF; the first alternative might allow a faster decision by the Planning Board/Board of Appeals, while the second might save the applicant the cost of preparing material the Boards would not have required.

Complete part 1 of the Environmental Assessment Form required under the State Environmental Quality Review Act (SEQR).

NOTE: If the Planning Board, on reviewing the Environmental Assessment form; finds a significant adverse impact that may result from the project, it must require completion of an Environmental Impact Statement, done to its satisfaction, before deciding on the permit application.
