- ☐ Commercial Driveway/Roadway Improvement – major
- ☐ Beautifying ROW – (for civic groups only)
- ☐ Temporary Signe, Banners, Christmas Decorations
- ☐ Traffic Control Sign
- ☐ Warning & Entrance Signs
- ☐ Tree Work, (removal or planting)

Work may be described briefly as follows: _____

General Setback Requirements:

Where curb cuts are made for the construction of driveways, the entire curb section shall be removed and replaced with a curb of 1 inch reveal. The removal of only the raised portion of the curb and paving over the broken section shall not be allowed. Cut curb ends shall be tapered from full height to 1 inch above ground level in a distance of approximately two feet. Where drainage is carried along the curb, the driveway shall be constructed with a short upgrade to prevent runoff from spilling into private property. Details of a curb cut are shown on Figure 7.

Sketch Plan of Property & Proposed Driveway

This Sketch Plan should include:

1. The location and dimensions of existing highway pavement, curbs, guide rails, medians, sidewalks, utilities, traffic signs, signals, pavement markings, and right-of-way and property lines.
2. The necessary setback distances from existing roadways and adjoining properties as set forth in the Village of Philmont Driveway Ordinance.
3. The location of existing and/or proposed buildings on the property.
4. The proposed driveway location throughout the property.
5. The location of any existing or proposed drainage structures at the property.
