

CITY of YORBA LINDA

COMMUNITY DEVELOPMENT | BUILDING

Subject: Smoke Alarms and Carbon Monoxide Self Certification

This self-certification shall be filled out by the contractor, property owner, or authorized HOA representative and given to the building inspector at final inspection.

Permit Number:	Date:
Project Address:	
Property Owner:	
Contractor/ Authorized Agent:	
Authorized HOA Representative:	

The undersigned does hereby certify that I am the property owner of the above referenced property. I further certify that smoke alarms and carbon monoxide alarms are present and functional in all the following locations.

All boxes below must be checked:

- ☐ **Smoke Alarms and Carbon Monoxide Alarm:** On the ceiling or wall outside of each separate sleeping area in the immediate vicinity of bedrooms or in each hallway outside of the rooms.
- ☐ **Smoke Alarms:** In each room used for sleeping purposes.
- ☐ **Smoke Alarms and Carbon Monoxide Alarm:** In each story, including any habitable basement. (Note: In dwellings or dwelling units with split levels and without an intervening door between the adjacent levels, a smoke alarm and a carbon monoxide detector installed on the upper level shall suffice for the adjacent lower level provided that the lower level is less than one full story below the upper level.)

Retrofitted detectors may be battery operated for buildings where no alternations are performed on the interior. Multiple-purpose alarms (carbon monoxide and smoke alarms) shall comply with all applicable standards and must be approved by the State Fire Marshall. The devices must be installed per manufacturer's specifications.

NOTE: These requirements only apply to the dwelling unit(s) for which the permit applies. For example, if an apartment building roof is replaced all the units within the building would be required to be retrofitted and verified to have the detectors and alarms. For an interior remodel of a single unit, only that unit would be required to be retrofitted/verified.

This self-certification applies only to projects involving exterior work where the City of Yorba Linda inspectors do not require access to the interior of the dwelling during construction. Examples include re-roofing, re-siding, patio covers, solar photovoltaic installations, and similar exterior improvements.

☐ Property Owner ☐ Contractor ☐ Authorized Agent ☐ Authorized HOA Rep.
