

RESIDENTIAL TREE PLAN APPLICATION

As required by the Unified Development Ordinance (UDO), Tree Protection and Planting Plans Must be submitted by the Developer or Builder and approved by the City Arborist prior to issuing the building permit. This document will serve as your application, and once received by the Inspection and Codes Department, will release your building permit so that you can proceed with your project. Builders submitting multiply addresses may list those addresses on a separate page and attach it to this application. Please be sure to supply all requested information. Thank You.

PROJECT INFORMATION:

Subdivision Name

Lot Size

Project Address

of Trees Required

Lots containing 7500 square feet or less require one tree to be planted which may be located anywhere on the lot.

Lots containing 7500 square feet or greater require two trees one of which must be a large maturing canopy tree and one which must be located between the street Right -Of-Way and the front building line.

Minimum caliper size for Large Maturing Canopy Trees is Two Inches as measured six inches above the root ball soil line.

Minimum size for Small Maturing Trees is 1.5 Inches as measured six inches above the root ball soil line.

To determine the caliper of Multi-Stem trees, measure each stem at six inches above the root ball soil line and add together.
